RING SIZING GUIDE

TIPS ON USING THIS GUIDE

♦ Prior to measuring your finger, confirm the accuracy of the printer paper by measuring the size of the box to your right with a ruler or measuring tape.
♦ Pull the paper sizer so that it is close-fitting to your finger. This will help yield an accurate measurement.
♦ Measure your finger at the end of the day to get a more accurate measurement.
♦ Do not measure your finger when your hands are cold or wet.
♦ Bands and rings that are larger than 5mm in width may fit more tightly than rings of the same size in a narrower width.
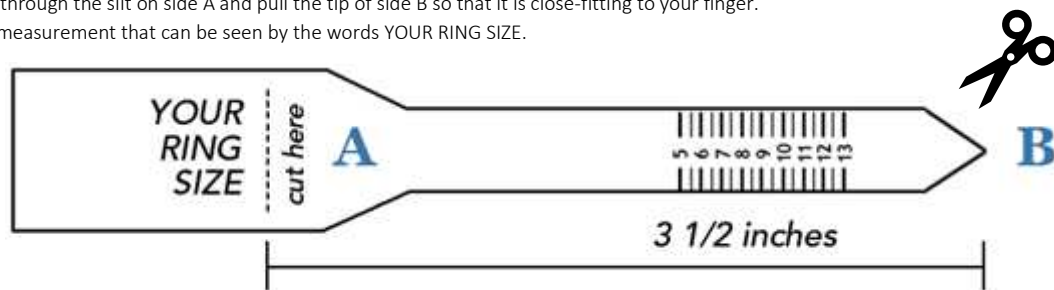

ACCURACY TEST

0   2

Measure with ruler to make sure paper printed accurately. Confirm that that the length is *two inches* long before using ring sizing guides.

THERE ARE TWO EASY WAYS TO MEASURE YOUR RING SIZE.

OPTION 1: Use cut out ring sizer.

♦ Using scissors, cut out the ring sizer.
♦ Cut a slit in the paper on side A as indicated by the dotted line (*cut here*).
♦ Loop side B through the slit on side A and pull the tip of side B so that it is close-fitting to your finger.
♦ Record the measurement that can be seen by the words YOUR RING SIZE.

YOUR RING SIZE | cut here | A   B

3 1/2 inches

OPTION 2: Use an existing ring and compare it on our chart.

♦ Choose an existing ring that fits properly on the finger you are buying a ring for.
♦ Place the ring flat on the paper and compare to the different sizes until you find the image that matches the *inside measurement* of your ring.
♦ If the ring falls in between two sizes, order the quarter size in the middle.

5	5.5	6	6.5	7	7.5
15.6 mm	16.0 mm	16.45 mm	16.9 mm	17.3 mm	17.7 mm
8	8.5	9	9.5	10	10.5
18.2 mm	18.6 mm	19.0 mm	19.4 mm	19.8 mm	20.2 mm
11	11.5	12	12.5	13	
20.6 mm	21.0 mm	21.4 mm	21.8 mm	22.2 mm
